

Upmatic® 4110

Upmatic 4110 = fully-automatic filling and closing machine for paper bags - With or without handle - From 1 to 10 kg.

Suitable with all bulk and granular products for the food and non-food industries.

The Upmatic 4110 is extremely reliable and easy to operate. The paper bags are taken from a magazine and conveyed under the filling hopper. They are opened and filled pneumatically, passing by a vibrating system under the hopper. The product is spread evenly in the bag.

After the filling, the bag is pneumatically closed, sewn up and conveyed. All adjustments can easily be carried out without tools.

An industrial sewing machine, a collecting belt and a vacuum pump are supplied as standard equipment. Combination with all common weighing and dosing equipment is possible.

In our customers' interest, we reserve the right to introduce technical changes.

Upmatic® 4110
