

Gross Weigh Bagging Scales

JEM International manufactures and sells more gross bagging units than any other company **worldwide**...the greatest value in the bagging industry!

GWM Wolverine

Our gross weigh baggers weigh all free flowing materials into paper, cloth polywoven, or plastic bags with guaranteed accuracies. They have a minimum of moving parts for maximum efficiency and lower maintenance. They are delivered pre-calibrated to your particular product ready for immediate installation and use. Belt feeders, auger feeders or box filling attachments can be added.

The **GWM** gross weigh bagging scale is designed for filling free flowing, non-dusty products at 5 to 6 (50 lb or 25 kg) bags per minute at +/- 4 oz. (100 grams) accuracy.

Typical products include grain, seed, pellets, dry feed and salt.

The scale is available in mild steel construction, stainless contact platework or all stainless steel construction. The Cam Grip Spout sizes are 22" and 29" circumference.

GROSS WEIGH

GWM-C Wolverine

The **GWM-C** gross weigh bagging scale is designed for filling free flowing, dusty products at 5 to 6 (50 lb or 25 kg) bags per minute at +/- 4 oz. (100 grams) accuracy. Typical products include grains, meals, and prilled fertilizer.

The **GWM-C** is available in mild steel construction, stainless contact platework, or all stainless steel construction. Our Dust Tight design Spout sizes are 21", 25", or 31" circumference. Belt Feeder and Auger Feeder are available for semi and free flowing products such as: texturized feeds, range cubes, rock, and powders.
