

PALLET HANDLING – HYDRAULIC LIFT CONVEYOR

Increase Productivity with Wulftec® Pallet Handling Solutions

Hydraulic lift are needed when the load has to match two different conveyor line pass height.

A conveyor mounted on a scissor mechanism will rise or lower the load to the correct height.

Note that, if load needs to be carried from floor level, the system requires to be pit mounted.

TECHNICAL SPECIFICATIONS

Length : 60" (other dimension available)

Width : 52" BFR

Height : 18" top of roller and lift up to meet 30 " pass height

Speed : 30 FPM

Rollers : 2.5"-3" diameter center to center

Capacity : 5000LBS

Photo eyes : Between conveyor rollers diffuse eye Sick # WTR2-P52ISI4

Motors : Baldor 460-230 VAC /3A / 60Hz

AC drive : Allen Bradley PowerFlex4 230 VAC / 3A /60Hz-I HP

Jonction box : NEMA 4/12 junction box with PVC pipes

Hydraulic : Hydraulic power pack with valves and oil tank
