

## INNOTECH - REVO

The modular bag maker series – from the standard solution up to high ambitious tasks

### FEATURES AND ADVANTAGES OF THE REVO

- Usable for most of the common Vffs-bags
- Lowest wear tear sealing system
- Heat seal tools, continuous heat seal tools and impulse sealing tools applicable, Ultrasonic available as an option – depending on the requirements and film quality.
- Safe film running through efficient film deduction and standard automatic film tracking
- Safety sealed seams welded by high pressure – programmable opening width
- Fast change of film rolls through specially adapted film splicing tables
- Vacuum supported film transport available as an option
- Industrial PC-control or SPS with color touch-screen, including 100 product settings (up to 1000 as an option), different operator levels (password-protected), backup with USB stick, data transfer by memory card or Ethernet. Depending on customers' demands, several options for remote services are available

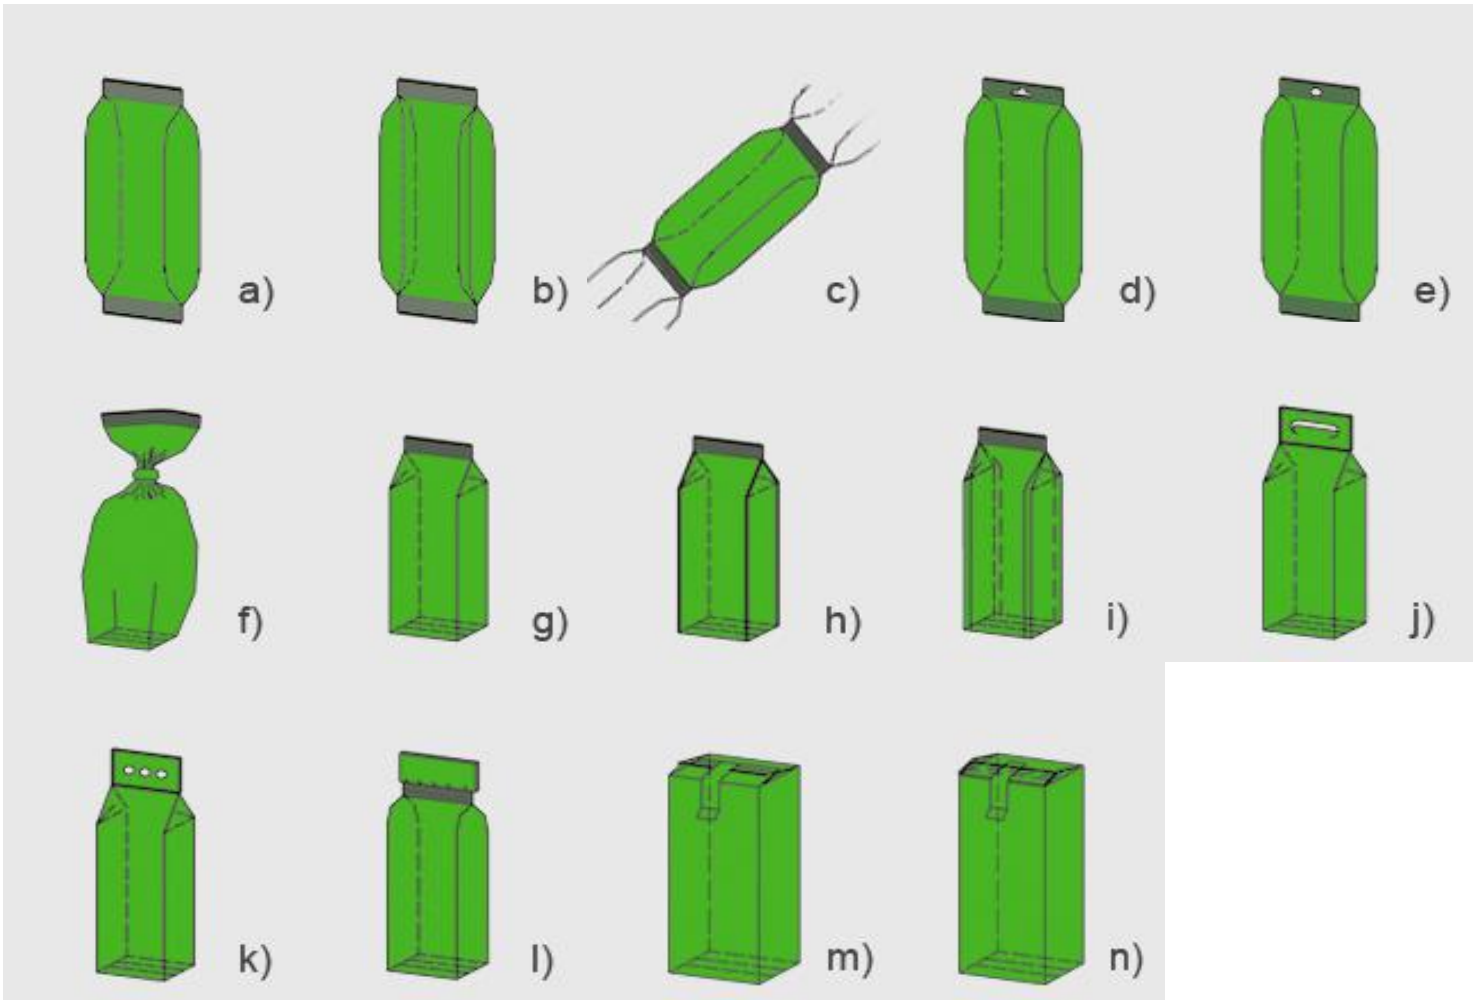

- Frame and electrical cabinet made of full stainless steel
- Easy cleaning of the machine because of no painted parts
- Easy access to frame thanks to a big removable cover plates
- All REVO-systems have extreme low wear and tear

TYPE	2500 REVO	3200 REVO	3800 REVO	4500 REVO	6000 REVO
Bag width (mm)	50-250	80-320	80-380	100-450	250-600
Bag length (mm)	350	500	550	600	≥800
Bag types	All types of common vffs-bags, as well as bags in special design				
Film type	All common heat-sealable films, as well as polyethylene				
Max. Mech. Speed (cycles/min.)	100	100	90	60	30
Electrical supply	230/400 V, 50 Hz Phases N/PE (others on request)				
Pneumatic supply	5 bar constant pressure, free of oil and condensate

## CURRENT BAG SHAPES APPLICABLE WITH ALL REVO MODELS

a) Pillow shape bag
b) Gusseted bag
c) Chain type bag
d) Pillow shape bags with euro hole
e) Pillow shape bag with suspension hole
f) Pillow shape bags with clip or twist closure
g) Flat-bottom bag
h) Flat-bottom bag with grooved edges
i) Flat-bottom bag with edge sealing
j) Flat-bottom bag with carrying handle
k) Flat-bottom bag with 3 hole carrying handle
l) Flat-bottom bag with attached cardboard label
m) Flat-top block bottom bag (folded once)
n) Flat-top block bottom bag (folded twice)
